# Sloppo's Field Notes

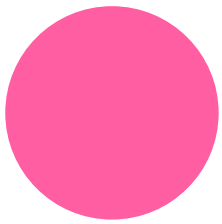
Slime is mostly water, and mostly patience.

Goo spreads faster on tile than on carpet.

Keep a towel nearby. Keep two towels nearby.

Glitter is not a food group, however hard it tries.

Check the goo log every morning before breakfast.



# Chapter Two: Shape

A good slime holds its shape for about an hour.

Round is the default. Square is a lifestyle choice.

Warm goo flows. Cold goo sulks.

Always label your containers with the date.
